MR BEAMS™

MR. BEAMS SPOTLIGHT

★★★★★ **Good spotlight for Deck or Porch**

By *murdock27* - 7/6/2008 ([More reviews by this User](#))

The light works very well. I've used it on the front porch and back deck. It goes on when it detects motion, stays on for several minutes, and then goes off automatically. The beam is surprisingly bright.

★★★★★ **A wireless, dusk to dawn motion detector...**

By *santostexas* - 6/24/2008 ([More reviews by this User](#))

The lamp is well constructed, it can be installed anywhere, up above, anywhere on the wall, stairs, garage, driveway, house entrance, etc.. At first I was doubtful of how long the batteries would last since the lamp does provide good lighting in a good area. I thought I was going to have change the batteries in a week or less, and it has been three weeks and the lamp is still as bright as when I first got it. The installation of the lamp is easy. anyone can install with a simple power screw driver. I could use lamps like this through out the house, inside and out, in the garage, in my work room and just about anywhere it would be nice to have automatic reliable lighting that does not cost an arm and a leg to buy and to operate. I am very interested in seeing how long the batteries last.

★★★★★ **Spotlight Review**

By *Celtics17* - 6/23/2008

Installed the spotlight outside on my deck, specifically for the purpose of outdoor grilling. In the past, I'd have the flashlight in one hand and spatula in the other. The spotlight provides the perfect amount of light for my application and I don't even have to bother with turning it on and off. It also serves as a security light since it turns on if anyone approaches the deck stairs.

★★★★★ **Tiny Light Packs a Punch**

By *christy_decker_fans@yahoo.com* - 6/23/2008

At first I was a considerably skeptical as to how much light this little black unit could produce. I have priced lights in the past, and all of the bulbs were at least twice the size and ran off electricity. The spotlight that it produced was much stronger than I had anticipated. Also, it covered a wider area than I had assumed that it would. This light is well worth the purchase price for the extra piece of mind that it provides. My husband no longer worries when I return home from work at night because my car turns on the light before I ever get out of my car. It allows me to see my surroundings prior to departure from my safe vehicle.

MR. BEAMS STAIR LIGHT

★★★★★ **Motion Sensor Stair Light**

By *bbriscoe* - 7/7/2008

This Stair Light is absolutely wonderful! A regular nite light doesn't even compare to this light because of the sensor. I have installed this in my hallway which is so dark at night. I don't have to turn on my light anymore. It automatically lights when I go into the hallway. It was very easy to assemble and can be mounted by screws or mounted by two-sided tape which is included. You can also put it on a dresser or stand. I love it!

★★★★★ **So Many Uses**

By *christy_decker_fans@yahoo.com* - 6/23/2008

Who would have thought that a product slightly larger than a pager could produce a powerful stream of light. The best part of the unit is that its ease of installation. I took it out of the box, put in the batteries, and attached it with the sticky strip. If it took me two full minutes, I'd be surprised. This light is perfect because its not too bright. It is strong enough to see clearly, but dim enough not to blind you. I love this light at night. If I wake up at night and need to go down the stairs, it shows me my path. Yet, it doesn't "wake" me up the way an overhead light would. The uses of this product are endless. It could be used to let the dog in and out in the middle of the night, or even as nightlight for the bathroom or hallway.

★★★★★ **Mr. Beams Stairlight**

By *roserossi* - 6/27/2008

I love this small powerful light. Love the color, would buy again.

★★★★★ **GREAT PRODUCT**

By *SteveDepot* - 6/18/2008

This is the most useful lights I have seen. Rather than using my carport lighting at night I simply placed one of these above my door. When you pull into the driveway there is enough light to see by and then coming into the carport it clicks brighter for increased visibility. There is no comparison.

★★★★★ **Works as Advertised**

By *alsID* - 5/24/2008

Good little light. It saved me having to install a hard wired 120v light next to an exterior door lock which was difficult to see and use at night.

This little unit was easy to install next to the lock and works as advertised. It operates only at night which is great because it saves battery drain during daytime
