Superline™ Reflektto™ MR-16 Aluminized Reflector

Superline™ Reflektto™ series of Halogen MR-16 lamps provide professional accent lighting through evenly distributed light. The multi-lense geometry of the reflector surface in conjunction with an axial, computer-aligned filament, uniformly illuminates any surface. There is no ring-shaped shadow and no black spot in the middle of the light pattern.

The Superline™ Reflektto™ combines an aluminum deposition and a high temperature colored coating on the reflector to prevent any back-spill of light and to reduce heat to the back of the lamp. The aluminized coating redirects heat through the front of the lamp, thus diminishing the risk of thermal damage to sockets, transformers, and ceilings. The Superline™ Reflektto™ is offered in three designer colors of matte black, silver and bronze — ideal for low voltage cable and track lighting.

FEATURES & BENEFITS

APPLICATIONS

SPECIFICATIONS

FEATURES & BENEFITS

- No light diffusion from back-spill
- Reduced Heat to socket, fixture and transformers
- 80% reduction of IR to the back of the lamp
- Decorative Aluminum coating in black, silver & bronze
- Axial filament for precise beam control
- Dimmable
- Crisp with Halogen light
- UV-cut Halogen capsule
- Low Voltage - 12 Volts
- Universal Burn Position
