

Air Switches

Intermatic air switches provide safe, wireless control for up to three separate loads. Pumps, jets and lights can be conveniently controlled with the touch of a button.

- Simple to install and operate
- Ideal for spa applications – no electricity at the spa increases safety
- Operate a pump or blower and a light up to 100 ft. away
- Intermatic maintains the industry's lowest return and failure rates
- Installation and operation instructions provided in multiple languages
- Available in both plastic and metal Nema 3R enclosures
- Made in the USA for ensured reliability

See details on page 26.
