HYDROPONICS®**

FloraMicro®

Advanced Nutrient System®

FloraMicro® Hardwater is specially formulated for hardwater conditions. Just like our regular Micro, it provides rapidly growing plants with Nitrogen, Potassium and Calcium, a combination of chelated micronutrients and trace elements.

- Excessive Calcium is the main factor in your decision to use FloraMicro Hardwater. If the total dissolved salts (TDS) in your water supply measure 200 ppm or more, we recommend that you obtain a water analysis to determine Calcium content. If the analysis reveals a Calcium content of more than 70 ppm (mg/liter) then you should use FloraMicro Hardwater instead of regular FloraMicro.
- FloraMicro Hardwater provides plants with proper nutrition when combined with the purified minerals in FloraGro and FloraBloom.
- Adjust the nutrient mix to meet specialized needs for each phase in a plant's life cycle: seedling, vegetative, transitional, flowering and fruiting.
- Refer to the Basic Applications Table for mixing recommendations. Please measure accurately. Reduce nutrient strength if plants show signs of stress, or if growing in very bright, hot, or dry environments.

SHAKE WELL BEFORE MIXING. Always add FloraMicro Hardwater to fresh water first and stir well, then add FloraGro and/or FloraBloom. Never combine FloraMicro with FloraGro or FloraBloom in undiluted form; doing so may cause nutrient lockout.

Basic Applications Table

	FloraGro	FloraMicro	FloraBloom		FloraGro	FloraMicro	FloraBloom
	1/4 tsp/gallon	33 ml/100 liters	1/4 tsp/gallon	1/4 tsp/gallon	33 ml/100 liters	1/4 tsp/gallon	33 ml/100 liters
Cuttings and Seedlings.....	1/4	33	1/4	33	1/4	33	33
General Purpose - Mild Vegetative...	1	132	1	132	1	132	132
Aggressive Vegetative Growth.....	3	396	2	264	1	132	132
Transition to Bloom.....	2	264	2	264	2	264	264
Blooming and Ripening.....	1	132	2	264	3	396	396

These values are intended to be used without supplements. When using supplements, please refer to genhydro.com for complete Feed Programs.
