

PRIME is a sweetener, enhancer, and microbial feed that unleashes a garden's phenotypic scents, colors, flavors, sugars, and essential oils. PRIME promotes vigor, lateral branching and an explosion of beneficial fungi and bacteria. PRIME's chemistry represents Heavy 16's unique approach to plant nutrition by synthesizing complex systems into simple, practical science.

HEAVY 16™

Heavy 16's PRIME is to be used throughout the entire lifecycle of your crop to establish microbial colonies, synergize compost teas, enhance vegetative vigor, and optimize fruiting scent, flavor and appearance.
