

INTERNATIONAL VOLTAGES

IOTA Emergency Ballasts can be modified to accept various international voltage standards. International units are indicated by the emergency ballast model number followed by the specific voltage ratings of the unit. For example: I-32 240V 60Hz or ISL-540 220V 50Hz. Available international voltage options are 220 and 240V, and 50 or 60Hz.
