

# Paraclipse® Fly Control Systems

I'm finished with the dumpster, let's contaminate the food over there...

Salmonella

Decorative Commercial Unit — Insect Inn Ultra

Commercial / Industrial Unit — Terminator

Home / Light Commercial Unit — Fly Patrol

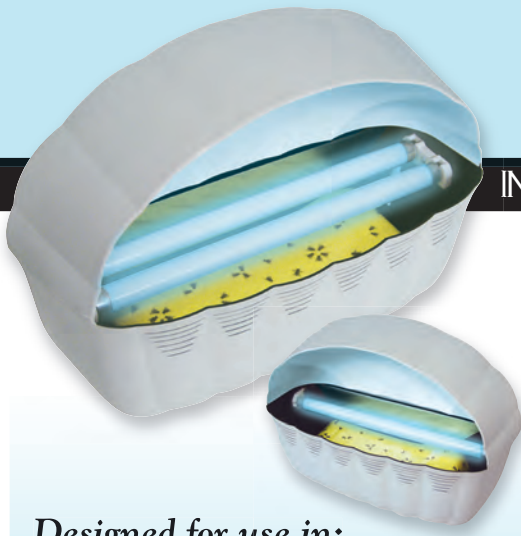

Wait! Let's check out that light and those pheromones first!

E. Coli

Paraclipse™ Insect Inn Ultra™  
 Dimensions: 18.5" x 15.25" x 6.75"  
 Weight: Ultra I – 5 lbs. Ultra II – 5.5 lbs.

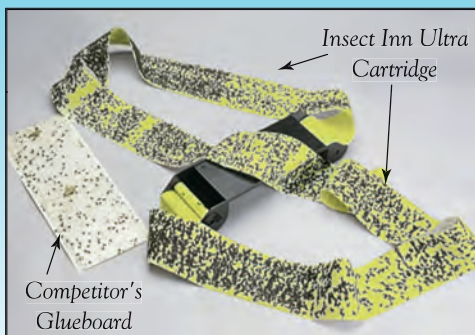

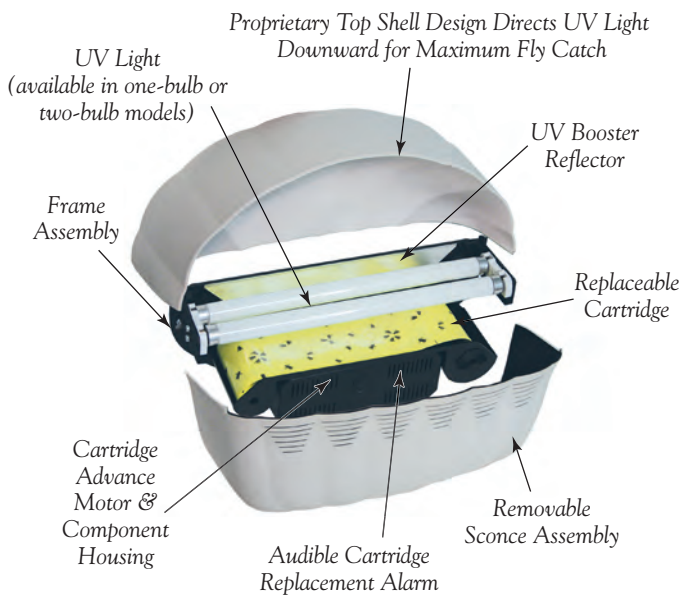

## INSECT INN ULTRA I & II - Decorative Commercial Unit

### Designed for use in:

- Full-Service Restaurants
- Fast-Food Restaurants
- Supermarkets
- Convenience Stores
- Delicatessens
- Lounges/Bars
- Large Offices
- Buffets
- Dining Areas
- Bakeries
- Snack Bars

The Insect Inn Ultra™ is the inconspicuous, commercial fly control system that works. Its patented auto advance cartridge lasts 60 days and can capture over 2000 flies! The Insect Inn Ultra™ is available in one-lamp or two-lamp models. This wall mounted unit, which doubles as an attractive decorative light fixture, is an effective, environmentally safe way to control flies. The Insect Inn Ultra™ meets all USDA and FDA guidelines.

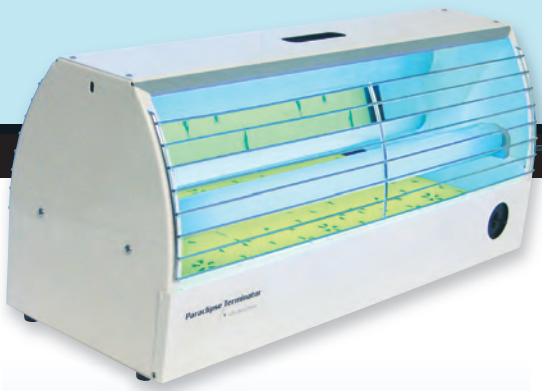

- Holds up to 10 times the capacity of a standard glueboard
- 584 sq. inches of continuously moving trapping area

Paraclipse™ Terminator  
 Dimensions: 23" x 10" x 8.5"  
 Weight: 9 lbs.

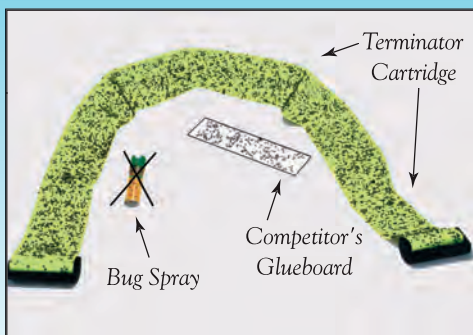

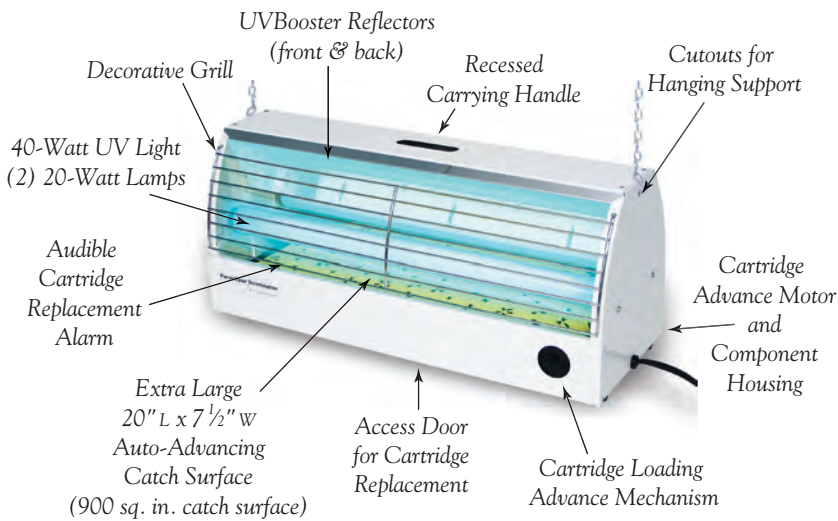

## TERMINATOR - Commercial / Industrial Unit

The Paraclipse™ Terminator is a commercial/industrial multi-function portable fly trap. Because its ingenious design utilizes two lamps and UV Booster Reflectors, the Paraclipse™ Terminator attracts flies from both sides of the unit. The unit may be used free-standing or suspended from the ceiling. Its high volume 60-day cartridge system traps 20 times more flies than glueboard units.

### Designed for use in:

- Commercial Kitchens
- Food Processing Plants
- Food Preparation Areas
- Bakeries
- Supermarkets
- Warehouses
- Poultry and Egg Ranches
- Hospitals

- Holds up to 20 times the capacity of a standard glueboard
- 970 sq. inches of continuously moving trapping area

**Paraclipse™ Terminator**  
 A Fly's Worst Enemy

Paraclipse™ Fly Patrol  
 Dimensions: 12.25" x 12" x 6.25"  
 Weight: 3.5 lbs.

## FLY PATROL - Decorative Home / Light Commercial Unit

The Paraclipse™ Fly Patrol is the ultimate home decorative fly control system. Yet it is also powerful enough for light commercial use. Its small size enables it to comfortably blend into the decor of any home or small restaurant or dining area. The Paraclipse™ Fly Patrol uses a highly effective combination of special UV light, attractants and trapping surface to trap flying insects. Its patented automatic advance 30 day cartridge is capable of eliminating large quantities of flies.

### Designed for use in:

- Kitchens
- Family Rooms
- Recreational Rooms
- Dining Rooms
- Garages/Workshops
- Conference Rooms
- Small Restaurants/Delis

Proprietary Top Shell Design  
 Directs UV Light Downward  
 for Maximum Fly Catch

Quantum  
 UV Lamp

Replaceable  
 Cartridge

Cartridge Advance Motor  
 & Component Housing

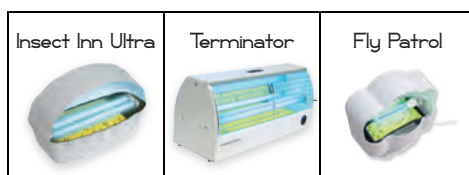

Audible  
 Cartridge  
 Replacement Alarm

- Holds up to 10 times the capacity of a standard glueboard
- 162 sq. inches of continuously moving trapping area

Insect Inn Ultra      Terminator      Fly Patrol

FEATURES	PARACLIPSE UNIT			BENEFITS
Highly effective combination of special UV light, attractants and trapping surface	X	X	X	Draws flying insects to trapping surface and keeps them trapped
The trapping system is environmentally friendly (designed for use in food handling areas and meets applicable guidelines)	X	X	X	No hazards from chemical pesticides and no scattered insect parts from electrocution
Sanitary	X	X	X	Unit helps keep your home or establishment safe and free from flies carrying diseases such as salmonella and E. coli
Unique cartridge placement—directly under lamp(s)	X	X	X	Flies quickly caught during random flight near the lamp
Ultraviolet Lamp Booster Reflector	X	X	X	Increases the outward reflective power of the UV lamp(s)
Easy to maintain, easy to clean	X	X	X	Since the units are easily cleaned with a damp cloth, this effective flying insect control won't make extra work for you or your staff
End of cartridge alarm	X	X	X	Audible alert to replace used cartridge
Fresh sticky surface and sex attractants released continuously	X 584 sq. in.	X 970 sq. in.	X 162 sq. in.	Provides increased catch surface for heavy duty fly control
Research-proven, flying insect-attracting UV light device	X	X	X	Effective attraction of flying insects already inside the building
Exclusive automatic advance cartridge trapping system	X 60-day	X 60-day	X 30-day	Replaceable/Disposable cartridge eliminates large quantities of flies
Specially engineered reflective top shell	X		X	Directs light out and down to increase overall effectiveness. Unit may be used on any color wall for maximum effectiveness
Front UV light baffle	X		X	Helps direct UV light downward to attract more flies
Versatile design		X		Can be used as a free-standing portable unit or ceiling hung
Decorative wall mount unit	X		X	Doubles as an attractive light fixture
Complete decorative fly control system	X		X	Looks like a decorative wall sconce to both guests and customers
Stylish unit can be placed in public areas	X		X	Your customers or guests will never know it's a flying insect trap
Integrated Pest Management (IPM) design	X	X		Provides both fly control and monitoring function
Specially engineered flying insect attracting device for commercial/industrial use attracts insects from both the front and back		X		An effective 'terminator' of flying insects

# Paraclipse® Fly Control Systems

"All of our fly control systems are non-toxic, clean, effective fly elimination systems that absolutely work!"

The **Insect Inn Ultra™**, **Terminator** and **Fly Patrol** all brilliantly eliminate the worries associated with other forms of flying insect control. For example, the problem with “bug zappers” is that they are extremely unsanitary. A bug zapper’s sole function is to blow insects to bits and scatter their remains all over whatever lays in the vicinity. However, with our patented trapping system, flies and other flying insects are fully contained inside the units. Once caught, they are there to stay.

Ultraviolet light has a seemingly magnetic pull on flying insects—especially flies. Our units use special UV light and strategically placed UV Booster Reflectors to draw flies already indoors to the units. The UV light they use is harmless to humans but fatally attractive to insects.

Our family of fly trapping units pose none of the contamination risks of chemical fly control systems. Our trapping system is environmentally friendly and largely biodegradable. They meet all applicable USDA and FDA guidelines.

As flying insects become trapped, the units' motorized mechanisms carry them into the take-up reel of the cartridges. The reel-to-reel action of the units are constantly presenting a fresh adhesive surface and fresh attractants. All three systems will continuously eliminate thousands of flies using a single cartridge which can remain effective for 60 days (*Insect Inn Ultra and Terminator*) or 30 days (*Fly Patrol*)!

Glueboards, on the other hand, often become useless after only a few days - their stationary trapping surface covered by dust, grease, dirt and maybe even a few flies. Maintenance of our fly control systems is also much easier and more sanitary. With the old glueboard system, you were left with no choice but to handle a glueboard that might be carpeted with flies. Definitely one of the most unpleasant and unsanitary chores imaginable.

Paraclipse's cartridge system, on the other hand, silently rolls the trapped insects inside a disposable cartridge. Only the cartridge is handled...never a fly-covered trapping surface.

We've blended sex pheromones and food scents right into the glue used on our trapping surface which is cleverly printed with decoys appearing to be feasting flies. In doing so, the fly's basic feeding and reproduction instincts are triggered. This combination of attractants and decoys on our unique trapping surface gives our fly control systems a powerful trapping capability.

In every way, our fly control systems have been designed with efficiency and effectiveness in mind. They will silently put an end to your flying insect disturbances and the spread of diseases they carry.

All of our fly control systems are non-toxic, clean, effective fly elimination systems that absolutely work!
