

PLT LED PAR36 INSTALLATION INSTRUCTIONS

Unlike halogen, LEDs are electronic devices (SSL) and precautions need to be in place for successful long term operation. While every effort has been made at the manufacturing level to insure against water intrusion, these lamps are not water submersible. They are however water resistant. IP65

1. Dig holes with the minimum dimensions as depicted below.
2. Surround lamp with pea gravel or its equivalent.
3. Utilize dielectric grease or silicon at the terminals.
4. Enjoy the new light
