

MILDEW CURE[®]

All Natural Fungicide

Plant Protection

MILDEW CURE[®] is a natural botanical contact fungicide that provides excellent control of powdery mildew on various crops and ornamentals. **MILDEW CURE[®]** is safe, effective, long lasting and suitable for organic food production. **MILDEW CURE[®]** protects your plants through harvest and is a great tool to use in your garden. It is less harmful to beneficial fauna than most fungicides.

MILDEW CURE[®] combats powdery mildew and controls powdery mildew infestation while offering little chance for disease resistance build-up.

SAFETY

MILDEW CURE[®] is derived from cottonseed oil and garlic extracts. These active ingredients are food grade materials so **MILDEW CURE[®]** is safe to use around children, pets, yards, schools, or other areas. There are no residue tolerance limits for any food crops, including fruits and berries.

MILDEW CURE[®] has the ability to suppress spider mite populations to some extent which will help preventively control powdery mildew.

MILDEW CURE[®] is listed with The Organic Materials Review Institute (OMRI) as a Botanical Pesticide for use on food crops. It is also approved under the WSDA Organic Foods Program.

When applying **MILDEW CURE[®]**, good coverage will improve the product efficacy. **MILDEW CURE[®]** gives better control when applied with a spreader such as **SAFERGRO[®]'s NATURAL WET[®]**. **MILDEW CURE[®]** works best as a preventative. Apply before disease symptoms appear for best results.

BENEFITS OF USING MILDEW CURE[®]

- All natural and organic
- Made from food grade materials
- Safe around children and pets
- Long lasting
- Effectively controls fungus
- Never leaves a residue or odd taste
