

HB1116R / HB3116R SERIES OUTDOOR TIMER INSTRUCTIONS

Thank you for purchasing the HB1116R Outdoor Timer with Stake and Receptacles. Please read the instructions below, before using this product:

Features

- Weather resistant cover with latch to secure up to six extension cords
- Six grounded outlets controlled by an easy-to-set timer
- Timer features two ON and OFF settings per day
- Unit can be wall mounted, or used with easy-to-install ground stake
- Added safety features include grounded cord and 15 Amp circuit breaker
- Manual override switch.

Timer Instructions (See Fig. 1)

1. Insert ON (Green) trippers and OFF (Red) trippers into dial at desired ON and OFF times.
2. Turn dial clockwise (→) one or more complete revolutions until the arrow head is aligned with the current time of day. Please note that AM times are in the white section of the dial, and PM times are in the black section of the dial.
3. Turn lamp or device ON.
4. Plug lamp or device cords into timer receptacles. Close and latch timer cover to protect receptacles from moisture. Plug timer cord into GFCI protected wall outlet if located outdoors.

NOTE:

Wall Receptacle Cover: In order to meet the 2002 National Electric Code you should use a receptacle cover that protects your outdoor receptacle when your timer is plugged in. Recommended for use are Intermatic Model WP1100C or for heavier cords sets, Models WP1110C or WP1150C.

Manual Override: Timer may be turned ON or OFF manually, by turning the override knob counterclockwise (←). The timer will resume the next scheduled ON and OFF cycle automatically. See Figure 1.

Circuit Breaker: If unit does not function properly, the circuit breaker may have been activated. To reset, unplug the timer from power source. Check to make sure the combined load of the lamps or appliances does not exceed the rated capacity of the timer. If so, disconnect items until the electrical load is within the prescribed limits. Press the circuit breaker button to reset. Plug timer into outlet and test by turning the manual override knob counterclockwise. See Figure 1.

NOTE: Whatever timer setting(s) are chosen, the setting(s) will apply to all 6 receptacles.

Wall Mounting the Timer: If timer is mounted on a wall, it must be at least 3 feet above the ground.

Stake Mounting: Place tabs on stake over the retention holes on the back of the timer. Push up on stake until tabs lock in place. See Figure 2. The stake should be inserted in the ground up to the barrier on the stake. See Figure 3. **DO NOT DRIVE THE STAKE INTO THE GROUND.**
