

Professional Foliar Enhancer (PFE) fortifies plants against stress using Calcium (four forms) and micronutrients. PFE's pre-formed photosynthates biochemically balance plants during stress. Use PFE before cloning, transplanting or changing light cycles. PFE is compatible with most hormones, fungicides, insecticides, soaps, oils and wetting agents. Use it with almost anything you spray.

Guaranteed Analysis:

Total Nitrogen (N)	1.00%
1.0% Nitrate Nitrogen	
Soluble Potash (K ₂ O)	2.00%
Calcium (Ca)	2.20%
Magnesium (Mg)	0.75%
Iron (Fe)	0.10%
Boron (B)	0.05%
Manganese (Mn)	0.06%
Zinc (Zn)	0.12%

Derived from:

Potassium Nitrate, Calcium Acetate, Calcium Nitrate, Calcium Gluconate, Calcium Chloride, Magnesium Nitrate, Magnesium Chloride, Manganese Acetate, Ferric Nitrate, Zinc Nitrate, and Boric Acid.

PROFESSIONAL FOLIAR ENHANCER

Professional Grade. Artisan Quality.

1-0-2
4L (1.06 Gal)

Directions for use: SHAKE WELL

Apply Heavy 16 PFE at a rate of 40mL/L (150mL/gallon) every 5-7 days until the fourth week of bloom. Use a spray bottle to apply in a fine mist. Avoid drenching the foliage. Once diluted with water, PFE lasts only 1-2 days, so mix only the amount to be used immediately. An oily sheen on leaves is normal and there is no need to adjust the pH. Simply mix with pure water and apply.
