ILLUMINATING THE FUTURE
What is LED?
The Light Emitting Diode…LED

Basically, LEDs are tiny light bulbs, or semiconductor diodes, that fit easily into an electrical circuit. But unlike ordinary incandescent lamps, they do not have a filament that burns out or gets hot. The diodes emit light when partnered with an electrical current and are illuminated solely by the movement of electrons in the semiconductor material.

The LED is called solid state lighting or "SSL" because light is emitted from a solid object, the semiconductor diode, instead of a vacuum or gas tube (like an incandescent, fluorescent or HID lamp). The diode itself is a two-terminal crystalline and when an electrical current passes through it, the recombination of positive and negative charges results in the emission of visible light. Less than one millimeter square, individual LEDs are clustered on a circuit board to create an array, which is then incorporated into a light fixture.

Lighting Facts and Nora Lighting

Who is Lighting Facts? Lighting Facts is sponsored by the Department of Energy (DOE) and is a program to assure that LED lighting products are represented accurately in the market.

How does Lighting Facts choose which products earn the label? To obtain the Lighting Facts approval, Nora had to submit verifiable photometric data for each LED product. If they meet the category criteria, lab testing and the performance results in five areas—lumens, efficacy, watts, correlated color temperature (CCT), and color rendering index (CRI), the products are approved and all five areas are represented on the label.

Why was the Lighting Facts Label established? The Lighting Facts label tells specifiers and consumers exactly what they can expect and gives them the reassurance that Nora LEDs perform to the stated levels. To show this, in a label similar to the Nutrition Facts, we supply the model number and all performance results within. The label is used on all marketing materials and packaging.

What does this mean for Nora? We can directly answer the question: Do your LED lighting products really perform as promised? As we know, not all LEDs do. With the Lighting Facts label, there is no question Nora’s LED products are superior in our industry and backed by the most prominent energy-efficient and government agencies.

Committed to Green
Nora Lighting has hundreds of fixtures that have earned the Energy Star Label

What is ENERGY STAR? Energy Star is the trusted, government-backed symbol for energy efficient helping us all save money and protect the environment through energy-efficient products and practices. The ENERGY STAR label was established to: Reduce greenhouse gas emissions and other pollutants caused by the inefficient use of energy; and make it easy for specifiers and consumers to identify energy-efficient products that offer savings on energy bills without sacrificing performance, features, and comfort.

How Does EPA Choose which Products Earn the Label? Products can earn the ENERGY STAR label by meeting the energy efficiency requirements set forth in ENERGY STAR product specifications. EPA established these specifications based on key guiding principles based on energy savings and efficiency nationwide, features and performance demands and testing requirements, utility bill savings, and proper labeling.

LED Diamond Retrofit Series

Nora’s newest family of LED recessed luminaries is uniquely designed using Cree® LEDs for retrofit applications, but can also be used in new construction and remodel applications. "RETROFIT" refers to an application where an existing housing installed in commercial, public, or a residential space is converted to another light source without having to remove the existing housing. Nora’s LED Diamond Series has been designed and tested to cULus standards to be used in Nora existing housings as well as many other manufacturers’ housings. The Diamond can also be specified for use with Nora dedicated housings. The ability to use the Nora LED Diamond Series in existing housings allows for easier, lower cost, replacement of an existing light source improving the pay-back factor when changing to LED Energy Saving lighting.

LED Platinum Series

Nora’s fist generation of LED recessed lighting is designed for new construction and remodel applications. Time tested in commercial, national account and residential applications across the US, the LED Platinum Series uses a separate LED module and a dedicated housing with an outboard mounted LED driver system allowing for excellent heat management. The Platinum series uses high output Osram® LEDs producing as much as 710 lumens. The die-cast aluminum LED module is integral to the die-cast low profile flange.

What is a "Dedicated" Housing and why use one?

Both the Nora Diamond and Platinum Series of recessed LED luminaries can be specified for use with respective “dedicated” housings. "Dedicated" refers to a housing, new construction or remodel, that can only be used with and is only cULus listed for use with a specific Nora LED recessed module. These housings come with a unique connector that can only be use with the respective Platinum or Diamond LED module.

Many local and national codes require the use of a "dedicated" LED unit to meet energy savings requirements for building energy codes, LEED’s points, and energy rebates. Because the "dedicated" housing requires and is cULus listed for the use of a specific Nora LED modules the end user cannot use or convert the installed "dedicated" housing to another low efficacy source. This can be very important to lighting specifiers and end users expecting a performance level and visual appearance as found in only the Nora LED unit.
LED Retrofit Diamond Series
4", 5" AND 6" LED ENERGY EFFICIENT RECESSED LIGHTING

Nora Lighting introduces a new series of LED Retrofit recessed downlights cULus listed and UL classified for use in existing 4", 5" and 6" Remodel or New Construction housings manufactured by Nora and others. The 10 watt 4" Retrofit provides 530 lumens, while the 11.8 watt 5" and 6" have 650 lumen output. All are offered in 2700K, 3000K and 4000K, are dimmable and consume 75% less energy than incandescent sources.

FEATURES
- 7 year limited warranty
- Smooth dimming down to 5%
- Title 24 and Energy Star Rated
- Qualifies for LEEDS points and Energy Rebates
- cULus Listed, Damp Location series and Wet Location series
- Tested in accordance with IESNA LM79 & LM80
- Scientifically designed lens diffuses the LED image while providing high lumen output; standard on all trims
- 5" and 6" produces 650 Lumens using only 11.8W
- 4" unit produces 530 Lumens using only 10W
- 2700K, 3000K and 4000K at 91 to 86 CRI
- Long life LEDs up to 50,000 hours
- Lighting Facts approved
- Save 75% compared to Incandescent source
- Available in 3 configurations: For medium based housings, GU24 optional socket, and dedicated hardwire with quick connect
- No ultraviolet or infrared wavelengths that cause fading of artwork and perishable merchandise. Mercury free!
- Does not emit forward heat like traditional light sources
- Available in Reflector and Baffle style in Bronze, Copper, Natural Metal, Haze, Clear, Black and White finishes

Easily replace your existing medium based incandescent lamp with an energy efficient LED. No tools required!

Apertures
3-7/8", 4-5/8" and 5-1/4"
Small size with high Lumen output

Qualifies for LEEDS points and energy rebates

Assembled in USA
Nora Lighting is excited to introduce a new product line to our LED family, LED Retrofit Diamond Recessed Luminaires. The Nora LED Retrofit Diamond is designed and cULus and Wet listed for use in existing 4”, 5” and 6” IC or Non-IC housings manufactured by Nora and others. Providing up to 650 lumen output and 91 to 86 CRI the LED Diamond Retrofit is an obvious choice for Green Energy Efficient Lighting in Commercial and Residential applications.

**Socket:**

Edison Medium Base Socket (included w/ Retrofit)
Quick Connect (included with dedicated)
GU24 Socket (accessory available)

**Installation:** Torsion springs

**Construction:** Scientifically and specifiable “Unitized Thermal Management system” (UTM) provides exceptional cool operation exceeding all industry standards.

**Lens:** Deep set for excellent glare control scientifically designed for optimal performance.

**Dimming:** Nora Diamond Retrofit works with standard leading and trailing edge dimming technologies. Dimming with leading-edge dimmers (electronic) are 5-100% and for trailing-edge dimmers (incandescent) 10-100%. There may be some cases that require more than one lighting fixture to be used to meet minimum dimmer load. Consult with dimmer manufacturer.

**Listing:**

cULus Listed for Damp Location (NLEDC-66/56/46 and NLEDR-66/56/46 Series)
cULus Listed for Wet Location (NLEDC-67/57 and NLEDR-67/57 Series)
UL Classified for use with most manufacturers IC and Non-IC housings
WSEC ASTM E283 for Air-Tight (with IC Housing)
Title 24 Compliant (GU24 & Dedicated Version)
Energy Star Rated
RoHS Compliant
Lighting Facts approved
7 Year Limited Warranty
Conforms to IESNA LM-79 and LM-80
