# Motion Sensing Deck Light

Battery operated LED deck light provides accent lighting at night and floods the deck surface with light when motion is detected.

## Features & Benefits:

- Accent light runs dusk to dawn
- Gradually changes light level as motion is detected to soften lighting transitions.
- Choose between maximum light output when motion is detected, or a power saving level to extend battery life
- Flood lighting is hidden and directed downward to eliminate glare
- Custom designed motion sensor covers 160 degrees by 30'
- Adjustable full on time of 30 sec or 5 min
- Patented "Low Glow Technology" extends battery life 1 to 2 years with 3 "C" alkaline batteries.
- LED Light Source – Never needs to be replaced

## Weatherproof For Outdoor Use
